How to determine your correct RSS feed URL for your blog

Here are the feed URL formats for the following blog providers:

1. Google Blogger (Blogspot)

Simply add **/feeds/posts/default** to the end of your blog URL:

For Example

<https://carolmarine.blogspot.com/feeds/posts/default>

2. FineArtStudiosOnline.com

For FASO blogs, you need to go to your blog and click on the **Follow this blog** link directly below the square orange and white button in the upper left hand corner of your blog.

This will take you to a new page, which is your feed. Select and copy the URL in your browser's address field. This is the feed URL to paste or enter into DPW.

The feed URL will look something like:

`https://data.fineartstudioonline.com/rssfeed
.asp?id=6064`

3. Wordpress

Generally a Wordpress blog feed URL is formed by simply adding **/feed** to the end of your Wordpress blog URL.

For example:

`https://janabouc.wordpress.com/feed/`

--

If your blog is not one of the above types, please contact your blog provider to determine your blog feed URL.
